Response to Amendment

This Office Action is in response to a communication made on November 16, 2005.

Claims 7-9 and 11 are pending in this application.

Claims 1 and 6 have been cancelled.

Claims 2-5 and 10 have been withdrawn from consideration.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 7-9 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Brown (6278448).

Regarding claim 11, Brown teaches a method of providing interactive bi-directional connections between a business contact and a client (Column 2, lines 44 – 51) comprising: providing a persistent interactive graphic object configured to establish an interactive, bi-directional connection between said client and a business contact; providing, as part of said graphic object, at least one function that can be performed by

said client (Column 13, lines 4 – 13); and transmitting information from said business contact to said persistent interactive graphic object (Column 3, lines 40 – 43).

Regarding claim 7, Brown teaches the method according to claim 11, wherein at least one function provided as part of said object includes electronic messaging with said business contact (Column 3, lines 40 – 43).

Regarding claim 8, Brown teaches the method according to claim 11, wherein said object can be relocated to a desktop (Column 3, lines 31 – 33).

Regarding claim 9, Brown teaches the method according to claim 8, wherein said object on a desktop remains in communication with a server and may receive data from said server for updating messages, services, or links associated with said object (Column 3, lines 40 – 43).

Response to Arguments

Applicant's arguments with respect to claims 7-9 and 11 have been considered but are moot in view of the new ground(s) of rejection.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U. S. Patent No. 5491784 issued to Douglas, because it discloses communication using objects between clients and business contacts.

U. S. Patent No. 5838790 issued to McAuliffe, because it discloses pulling advertisements off websites for display on desktops.

U. S. Patent No. 6636247 issued to Hamzy, because it discloses advertisements that interactively communicate with the ad server in attempt to make the ad more desirable to the user.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Bates whose telephone number is (571) 272-3980. The examiner can normally be reached on 8 am - 4:30 pm.
